

One Track – Countless Possibilities

BILSTER BERG is so much more than just a racetrack. It is the perfect setting for a product launch, a test circuit, for a track day or as a photo and film set.

The heart of BILSTER BERG is the 4.2-kilometer-long asphalt track. Walter Röhrl called it the world's most emotional racetrack. And with 44 crests and dips, 19 curves, a 26 percent downward gradient and a 21 percent incline, the circuit has a greater height difference per kilometer than the legendary *Nordschleife* of the Nürburgring.

Two for one

However, the track can be split into a 1.8-kilometer *Westschleife* and a 2.4-kilometer *Ostschleife*. This allows two groups to use the track independently, including separate entrances.

Two separate paddocks – the upper paddock measuring more than 9,000 m², the lower measuring 6,500 m² – can also be used independently of one another. Each paddock has its own pit lane with four pit halls each. Moreover, 19 rental halls are installed on the premises, each with its own sanitary facilities and electricity and water supplies, making them ideal locations for a variety of corporate events.

An off-road course with obstacles

A separate, five-kilometer-long off-road course offers a number of obstacles for off-road vehicles such as traverses, water ditches and a 100% downward gradient.

A driver safety course with skid training

For driver safety and perfection training, BILSTER BERG offers a 320 × 60 meter floodable dynamic track. This area can be used to simulate various driving situations and train drivers on how to handle them, for example driving on slippery or wet roads.

Outside of the car

... the modern Club House on the *Westschleife* offers a 360° view of the pristine Teutoburg Forest. And at TURN ONE, the restaurant on the *Ostschleife* terrace, visitors can round out an exciting day with delicious food and drink.
